

Dear Friend,

We did it!!

This October, New Harvest supporters raised \$101,996.90! After the gift match, that means **\$201,996.90 dedicated to advancing animal products made without animals.**

Thank you to the **67 unique donors** who doubled their contribution towards building a post-animal bioeconomy. It takes a visionary kind of philanthropist to recognize the importance of innovative research today, and the immense impact it can have tomorrow. We're proud and fortunate to have you on board.

...And now to spend those funds on some groundbreaking work. We already have some great projects and partnerships lined up, but we're always looking for more inventive and pioneering researchers to fund.

If you are a researcher looking for support in advancing animal products made without animals, please email me at isha@new-harvest.org. We'll be eager to share the details of our request for proposals.

Onwards and upwards!
