

Dear Friend,

This year, New Harvest did some incredible work.

- We gave \$50,000 to research on cultured meat made without animal serum, at the University of Maastricht.
- We gave \$53,000 to research on making 3D vascularized tissue - a steak - at King's College in London.
- We co-hosted the 1st International Symposium on Cultured Meat in Maastricht, the Netherlands
- We launched The New Harvest Egg Project, which became Clara Foods, a company that received \$1.85 million to make egg whites without laying hens.
- We helped Pembient raise \$17,292 to make rhino horns without rhinos.
- We brought together the team behind Memphis Meats... a company that has received \$100,000 to make pork without pigs.
- We helped the company we launched, Muufri, making milk without cows - secure €200,000 in non-dilutive funding.
- We launched a fellowship program at Tufts University for MSc and PhD students to work on tissue engineered foods.

And if we want to see a world where animal products are made without animals, we need to do more. Help us have an even more impactful 2016.

[Make a tax-deductible donation today and have it doubled by The Jeremy Collier Foundation.](#)

Your doubled support will help us increase our impact.

17 December 2015

Thank you for joining us in building a better future!
