ANNOUNCEMENTS

The latest news from New Harvest:

- We're in History Now! The History channel attended our conference and featured our work in one of their latest segments. Watch here!

- Gilonne gave a radio interview to the BBC, and it's now up online! The full interview starts at the 11:57 mark. If you're short on time, a 2 minute edit is available here.

- Indie Bio EU is now accepting applications for their 4 month program beginning in 2017! Applicants can submit a 140 word expression of interest here.

UPCOMING EVENTS

- Isha will present at Media Evolution's The Conference August 16 - 17 in Malmö, Sweden. Tickets have already sold out, but waitlist positions are available.

- The Second International Conference on Cultured Meat will be held from October 9 - 11 in Maastricht, The Netherlands. Early bird registration ends on August 15, after which ticket prices increase to €250.

FROM AROUND THE WEB

Our favourite content this week about the world of cellular agriculture:
• Dick Ahlstrom has written an article about Sothic Biosciences for *The Irish Times*: "The horseshoe crab is the unsung hero when it comes to medical devices and pharmaceutical products. The blood of the crab has unique properties that make it ideal for giving an absolute guarantee that an injectable product or implantable medical device is absolutely sterile" - and Sothic are making a biosynthetic equivalent that would eliminate the need to harvest the blood from crabs.

• Kimbal Musk is thinking about cellular agriculture! Kimbal spoke with Steven Overly at *The Washington Post* about the future of food and listed cultured meat and plant based alternatives as a way forward to reduce the negative impacts of meat production on the planet.

• Marta Zucker has released part II of her New Harvest 2016 conference recap! The blog post is in Polish, and can be accessed here.
