

ANNOUNCEMENTS

The latest news from New Harvest:

- **New Harvest's first Research Fellow, Abi Glencross, was featured in an article in *VICE Munchies* for her work on [cultured steak](#)!** Way to go Abi!
- **Marie Gibbons, our Research Fellow at North Carolina State University, is presenting on the topic of *Mass Production of Avian Muscle Cells: Establishing a Publicly Accessible Immortal Turkey Cell Line* at the [Second International Conference on Cultured Meat](#) held by Maastricht University, Brightlands, and New Harvest on Monday, October 10 in The Netherlands. Isha and Abi will also be attending - be sure to say hello if you're there!**

- Last week, **Isha moderated a panel on cellular agriculture at the North Carolina Biotechnology Center's AgBiotech Summit** with speakers Hultz Smith of Tyson Foods, Dr. Paul Mozdziak of NCSU, and Ryan Pandya of Perfect Day Foods. A summary of the event is available [here](#).
- Are excited about New Harvest's various pioneering research projects and the future of cellular agriculture? **You can help accelerate this future by becoming a donor.** We've had our most action-packed year ever, and the best is still yet to come. Become a part of it by [signing up to become a monthly donor!](#)

UPCOMING EVENTS

- Isha and some of the New Harvest Research team are attending the [Second International Conference on Cultured Meat](#) **October 9 - 11 in Maastricht, The Netherlands**. Tickets are still available!
- Gilonne will speak at [SXSW Eco](#) **October 11 in Austin, TX**.
- Isha is speaking at the [Hello Tomorrow Global Summit](#) **October 13 - 14 in Paris, FR**.
- Isha will be presenting at [London Food Tech Week](#) **October 14 - 21 in London, UK**.
- Isha is speaking at the [Fast Company Innovation Festival](#) **November 1 - 4 in New York City**.
- Isha and Erin are hosting a live online Q&A session at the [Disruptive Innovation Festival](#) on **November 9**.

FROM AROUND THE WEB

Our favourite content this week about the world of cellular agriculture:

- New Harvest is in Claire Brownell's [in-depth article](#) on **the future of protein** for the *Financial Post*.
- **Frank Vinluan has written a summary of the NCBC AgBiotech Summit** for *Xconomy*. Vinluan reports that "Hultz Smith, principal scientist at Tyson Foods is [in favor of cultured meat research](#). Traditional animal production isn't going away, and Tyson does not see these cultured meats as competition for poultry, he said. As the agriculture industry looks for ways to feed more people more efficiently, Tyson believes that meat produced by cell culture can offer consumers another choice."
- Funding for academic R&D is in decline. **How can philanthropy help make breakthrough discoveries in science (like cultured meat) possible?** As David Baltimore explains in his [piece](#) for *Science* magazine: "To solve some of our greatest societal problems, we not only need to focus on basic science research—we also need sufficient resources and new approaches. Basic research allows innovative thinkers in science and engineering to work toward ambitious and important goals... However, without adequate resources, great visions cannot be fulfilled. Although private funding cannot match the scale of government funding (the U.S. National Institutes of Health alone is allocated \$30 billion per year), it can help fill gaps. Most importantly, it can initiate research thrusts into unproven directions, which generally do not draw government funding."
- **Isha Datar tells the story of how her background in cell and molecular biology led her to New Harvest** in this [profile piece](#) for *Novel Protein's* Harmony series.

- **Sothic Biosciences is in the *Irish Times*' Innovation Awards supplement!** [Check out their story](#) on pages 56-57.

EMPLOYMENT OPPORTUNITIES IN CELLULAR AGRICULTURE

- Interested in designing custom microbes for clients across multiple markets? **Ginkgo Bioworks is hiring!** Learn from nature to develop new organisms that replace technology with biology. [The current list of opportunities at Ginkgo Bioworks is here.](#)
- Want to work at the intersection of fashion and biotech? **Modern Meadow is hiring!** The Brooklyn-based team creating bio-fabricated leather is growing, with openings for a number of positions. [Check out their website for more info.](#)
- Do you want to disrupt the food space by creating the world's first animal-free egg white? **Join Clara Foods!** Our second startup, Clara Foods, has several openings in their San Francisco-based team. For more information, [check out their website.](#)
- Is your cellular agriculture company looking to expand? [Get in touch](#) to have your job posting shared on the New Harvest newsletter and website!
