

ANNOUNCEMENTS

The latest news from New Harvest:

Donate Now to have your gift doubled
by the Jeremy Coller Foundation

- **You guys have *really* been making it rain during our biggest fundraiser of the year, our December [Raise for Research](#)!** This month, the Jeremy Coller Foundation will be matching all donations to New Harvest up to a collective total of \$100,000. **At only 7 days into the month, you have already gotten us \$25,000 towards our goal of \$200,000** raised by the end of December! Huge thank yous to all of those who have gotten this party started, and to the JCF for generously matching your contributions. If you haven't yet done so, you can [make your impact on cellular agriculture twice as strong today](#). **Looking for a meaningful, sustainable holiday gift idea? [A donation made in the name of a friend or loved one](#) will go a long way. And, if you work for an employer who is matching donations for the holidays, *your gift could be quadrupled* this month!** Together, I know we'll knock our fundraising goal out of the park and be able to fund even more cellular agriculture research in 2017.

NEW HARVEST FEATURES

This week's original stories by our staffers and volunteers:

- This fall, **New Harvest provided a grant to Kent State University PhD candidate Jess Krieger for her work on basic cultured meat research (including pork and lobster meat!) and bioreactor design.** Read more about Jess' research in our latest [Project Profile](#)!
- We've had an action-packed year. **If you haven't checked out our Year in Review for 2016 yet, peep it [here](#)!**

FROM AROUND THE WEB

Our favourite content this week about the world of cellular agriculture:

- What might Christmas dinner look like in the future? Dr. Paul Mozdziak provided comments for *Labmate Online's* [speculative piece](#) on what the **introduction of cellular agriculture could mean for holiday dinners in the years to come.**
- The range of new possibilities in food through cellular agriculture are exciting to think about, and **Sam Davies points out a potential benefit of 3D printed meat** that came to light in a recent study by Meat and Livestock Australia: [soft meats which are easier to chew and swallow](#) (for segments like the elderly).

EMPLOYMENT OPPORTUNITIES IN CELLULAR AGRICULTURE

- **Afineur is on the lookout** for new microbe tamers/fermentation gurus/flavor architects to join their Brooklyn-based team! Interested? Get in touch by writing to hello@afineur.com.
- Interested in designing custom microbes for clients across multiple markets? **Ginkgo Bioworks is hiring!** Learn from nature to develop new

organisms that replace technology with biology. [The current list of opportunities at Ginkgo Bioworks is here.](#)

- Want to work at the intersection of fashion and biotech? **Modern Meadow is hiring!** The Brooklyn-based team creating bio-fabricated leather is growing, with openings for a number of positions. [Check out their website for more info.](#)
- Do you want to disrupt the food space by creating the world's first animal-free egg white? **Join Clara Foods!** Our second startup, Clara Foods, has several openings in their San Francisco-based team. For more information, [check out their website.](#)
- **Is your cellular agriculture company looking to expand?** [Get in touch](#) to have your job posting shared on the New Harvest newsletter and website!

[New Harvest](#) is powered by people like you.
