A beautiful microscopic photo taken by NH Research Fellow Marie Gibbons, of partially differentiated cultures of turkey myospheres.

- Ever wondered how New Harvest earns and spends its money? We’ve published our unaudited financials for 2016 on our blog and Medium page. Keep your eyes peeled for our full 2016 annual report as well, which will be released later this year.

- The second-ever conference on cellular agriculture, New Harvest 2017, will be taking place in NYC this fall! Exact dates are TBD, so watch this space for updates! If you're interested in sponsoring or exhibiting at our conference, please get in touch.
UPCOMING EVENTS

- New Harvest's Meat/Culture video (created by Derek Lau) will be included in the Museum of Design Atlanta's exhibit Food by Design: Sustaining the Future until May 7.

- Isha is speaking at the Stanley N. Gershoff Symposium at Tufts University on March 31 in Boston, MA.

- Isha will be moderating a panel at the International Dairy Foods Association ProFood Tech conference, April 4 - 6 in Chicago, IL.

- The Modern Agriculture Foundation is hosting their cultured meat conference, Future Meating: The Path to Commercialization, May 7 in Haifa, Israel.

FROM AROUND THE WEB

Our favourite content this week about the world of cellular agriculture:

- Congratulations to Memphis Meats on the unveiling of their cultured chicken and duck product prototypes! The startup hopes to scale up their production process and have a cultured meat product on the market by 2021.

- What do video games have to do with cellular agriculture? New Harvest Research Fellow Jess Krieger recently gave her first TEDx talk on how her concern for climate change and love of gaming led her to the study of cultured meat. The video is now available online!

- Last week, we shared a short version of New Harvest Research Fellow Natalie Rubio's interview for the Soonish podcast. Natalie's full interview has been released here.

- The National Academies of Sciences, Engineering, and Medicine report "Preparing for Future Products of Biotechnology" focused on the regulation of novel consumer biotech products which may emerge in the next 5-10 years, including a discussion of cellular agriculture products like milk, eggs, and meat. The report was released
to the public last week, and a webinar presentation and Q&A can be viewed here.
